***DETAILED ACTION***

Claims 65-69 have been cancelled. Therefore, claims 1-64 are currently pending in this application. Claims 52-64 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

***Response to Remarks***

Applicant's arguments filed 30 June 2006 have been fully considered but they are not persuasive with respect to the restriction requirement. Applicants argue that the restriction requirement does not establish that searching all the inventions would constitute an undue burden to the Patent Office. Applicants argue that they haven't made any limitation to the scope of the elected group. The only defined core in the Formula is a pyrrole ring. There are numerous variables some of those variables represent chemically different groups ranging from H, to heterocyclic groups. The examination is going to be extended, however, the search will not include compounds which are outside the general classification of areas of the elected species.

The restriction requirement here is predicated on the premise that the various compounds involved differ in structure and element so much so as to be patentably distinct, i.e. a reference which anticipated the elected compounds claimed would not even render obvious the others. Again, 35 U.S.C. 121 gives the Commissioner (Director) the authority to limit the examination of an application to a single invention. Applicant has not presented evidence that the examined subject matter is patentably indistinct from the non-examined subject matter. Nor have the even

argued to the contrary. Moreover, the sheer number of variables, their huge possibilities, and the almost incomprehensible number of permutations and combinations thereof result in compounds so numerous and diverse so as to be a burden just to classify, search, and examine. Accordingly, the requirement to restrict is considered proper and is maintained. The search and examination of the application is directed to the generic embodiment identified for examination only.

i).

***The scope of the invention of the elected subject matter that have been extended and examined is:***

Compounds of formula (1) , wherein: **X** is as defined; **W** is as defined; **A<sub>1</sub>** is an optionally substituted six-membered heterocyclic group having N as the only ring heteroatom; **R<sub>1</sub>-R<sub>8</sub>** are as defined except that they don't represent a heterocyclic group.

As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-51 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as morpholine, pyrimidine, tetrazole etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 180(+) (triazine), class 546 subclass 249(+) (pyridines), class 548 subclass 215(+) (triazoles), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which

Art Unit: 1626

anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b).

### ***Objections***

Claims 1-51 are objected to for containing non-elected subject matter. .
